

EDUCATION

MASSACHUSETTS INSTITUTE OF TECHNOLOGY

Cambridge, MA

B.S. Mathematics and CS | GPA: 5.0 | Relevant Coursework: Algorithms I & II, ML, Abstract Algebra, Probability, Statistics

EXPERIENCE

- DeepInfra | Software Engineering Intern

May 2026 - August 2026 | Palo Alto, CA

 - Built a service-tier request scheduler for LLM inference in the backend, cutting priority-tier time-to-first-token ~50% by adding priority queuing to the existing batching/routing pipeline; enables differentiated 'priority' and 'flex' service tiers
 - Doubled inference throughput by tuning batch sizes, KV-cache, and speculative decoding drafters in NVIDIA TensorRT-LLM and vLLM across frontier production models like Gemma 4, DeepSeek V4 Flash, GLM 5.2, Kimi K3
- MIT Media Lab - Multisensory Intelligence Group | Undergraduate Researcher

Jan 2026 - May 2026 | Cambridge, MA

 - Designed and collected a multimodal dataset (sound, image, text) using piezoelectric film sensors across 22 materials, varying sampling rates, signal length, and repetition
- MIT Web.lab Web Development - Fast-paced Drawing and Guessing Game | Backend Developer

Jan 2026 | Cambridge, MA

 - Built “Panic! at the Easel” web drawing game supporting up to 8 players using HTML, CSS, and JavaScript with two teammates
 - Developed server-side prompt assignment and scoring algorithms that ensure fairness; implemented real-time multiplayer state updates via sockets
 - Won first place overall in the competition, among all website submissions
- MIT Institute for Medical Engineering and Science | Undergraduate Researcher

Aug 2025 - Jan 2026 | Cambridge, MA

 - Designed publication graph using 10+ authors and 2000+ publication data
 - Implemented the Leiden clustering algorithm for large-scale graph analysis and improved author name disambiguation
- Jane Street WISE | Participant

July 2025 | NYC, NY

 - One of ~40 female students selected nationally for Jane Street’s women in quantitative finance program
 - Applied combinatorial game theory and probabilistic reasoning to market-making exercises
 - Studied expected value and pricing through workshops led by traders and researchers

LEADERSHIP

- Harvard-MIT Math Tournament Organization Team | Registration Associate

2025-Present

 - Coordinate logistics for 800+ contestants; streamline check-in workflows and team communications
- MIT Informatics Tournament Organization Team | Internal Events Logistics

2025-Present

 - Manage scheduling and setup for onsite coding competitions; support problem distribution

ADDITIONAL EXPERIENCE

- Stanford University Mathematics Camp (SUMaC) - Program II Algebraic Topology

Summer 2024

 - Completed Stanford's selective program in topology and differential geometry; final project on the Gauss-Bonnet Theorem
- Selected Personal Projects

2023-Present

 - Implemented Hopfield Networks from scratch using Python, an image classification model
 - Built Calorie Counter and Shopping List applications in Java with Android Studio, using SQLite/ROOM database
- Canada/USA Mathcamp, MathILy Summer Program

Summer 2023, 2022

 - Acceptance rate of 10% and 15%, respectively; studied group theory, representation theory, Lie algebras, and abstract algebra

AWARDS

- USA Mathematical Olympiad Qualifier (USAMO), USA Junior MO Qualifier (USAJMO)

2023-2024
- Four-Time American Invitational Mathematics Examination (AIME) Qualifier (Highest score 12)

2022-2025
- Jane Street AMC 12A Certificate (Top 5 in Pacific NW Region)

2023
- Two-Time Math Prize For Girls Qualifier

2023, 2024
- USA Computing Olympiad Silver Division Qualifier

2022
- MIT Web.lab Web Development Competition First Place Winner

2026

SKILLS

Languages: Python, C++, Java, JavaScript; Tools: Docker, Kubernetes, Git; Data: MongoDB, Neo4j, SQLite; ML: PyTorch

HOBBIES

Social deduction games, jump-roping, playing oboe and volleyball
